-

Experience

Panduit, Folsom, CA

Aug 2016 - Present

Software Engineer

- Worked on the SmartZone application, which runs on Tomcat, has a MSSQL database with a Java backend and uses the EXT JS framework on the front end
- Primary project thus far has entailed increasing support for different PDUs in our application by reviewing the MIB files and using SNMP to get the OID values to be able to display different levels of power data
- Utilized the OBIX protocol to communicate with JACE devices
- Worked in Scrum environment and used the Atlassian Tools (JIRA/Bitbucket/Confluence)

EXL Healthcare, Chico, CA

Jun 2008 – Aug 2016

Software Developer

- Increased functionality and maintained code in medical management applications, the primary of which runs on Tomcat, uses an Oracle database, has a Java backend with a .Net front end
 - Improved the product by adding the ability to send and receive faxes by integrating with RightFax through the use of web services and JMS
 - Reviewed, provided feedback on, and implemented design specifications
 - Assisted the Support and QA departments by investigating errors and providing solutions
 - Wrote unit tests using JUnit and Mockito
-
